

6th question

Welcome to the Div and Span Example

This is a simple example of using the `div` tag to group elements and apply styles to a section of the page.

The word **highlighted** in this sentence is styled differently using the `span` tag.

Another example of using **span** to emphasize text.

CSS Box Model

Basic Box Model

Box with Different Margins

Box with Different Paddings

Box with Border-Box
Sizing
